RYNVELD'S WHOLESALE CATALOG

(FOR GROWERS, SEED STORES AND RETAIL FLORISTS)

THE FIRST PAGE

in your daily newspaper always contains the most interesting and important news of the day. You always read this page even though you may not have time for the rest, because you know that the biggest stories of the day have been selected for the most outstanding page of your paper. It saves you time and it saves you trouble, and it's usually written by the best informed and best writers on the staff.

THE FIRST PAGE

in bulb growing is occupied by Rynveld. Florists and retailers always read Rynveld's catalogue because they know that it is first page news,—that whatever they may need in the bulb line can always be supplied by Rynveld. Newer varieties of Gladiolus for commercial purposes, the finest strain of Amaryllis grown in the world, the most outstanding cut flower varieties of Dahlias, the highest quality Lily of the Valley obtainable—all these and more go to make up the most complete line of bulbs offered by any grower.

We do not say that every variety of bulb we grow is listed in this catalogue. To do so would take many volumes. We do say that we list all those which our tests have shown to be meritorious commercial varieties. We discard many times as many varieties as we list. Test gardens and greenhouses are maintained for this purpose, and you may be sure that what is listed herein has first been tried and found suitable.

To maintain this strict "censorship" policy requires, naturally, a huge investment not only in equipment, but also in experienced, practical growers. It is important to buy direct from the grower and it is more important to buy from a grower who keeps abreast of the times. We spare no expense in maintaining an up-to-date service for florists; a service which never can be given by the smaller growers because of limitation of capital, and lack of experience.

Long Island Grown Gladioli

While we believe there are no finer Gladioli than Long Island grown we can also supply Western grown. Ask for prices.

High crowned healthy bulbs. Absolutely free from disease. While a demand lingers for some of the older varieties, they are being rapidly replaced by the newer and better kinds. Progressive growers have been quick to recognize the added qualities, whether in earliness, size, color or productiveness, which more than justify the additional cost. We do not boost novelties, because we happen to grow a large stock but rather seek to offer our customers a concise list of the better kinds after thorough trials and many eliminations on our own farms.

First size—1½" diameter and up.
Second size—1¼" and 1½" diameter.

GUARANTEED FREE FROM THRIP when they leave our farm. Our bulbs are treated in accordance with recommendations of U. S. Department of Agriculture. We use extreme care and spare no expense, having established a modern treating plant at our farm.

Hardy Lilies

LILIUM REGALE

(Myriophyllum)

THE beauty of this fine Lily is well known and stands unequalled among those which thrive in this country. The trade has long awaited a supply of these bulbs at reasonable prices and we are now glad to have a stock sufficiently large to enable us to make a general offer. The bulbs we offer are good flowering size and we suggest that they be left undisturbed for several years as they will then enlarge annually and throw much larger flower spikes. Flowers are very fragrant, white trumpet shape with slight pink and other colored stripes on lower petals.

PEONIES

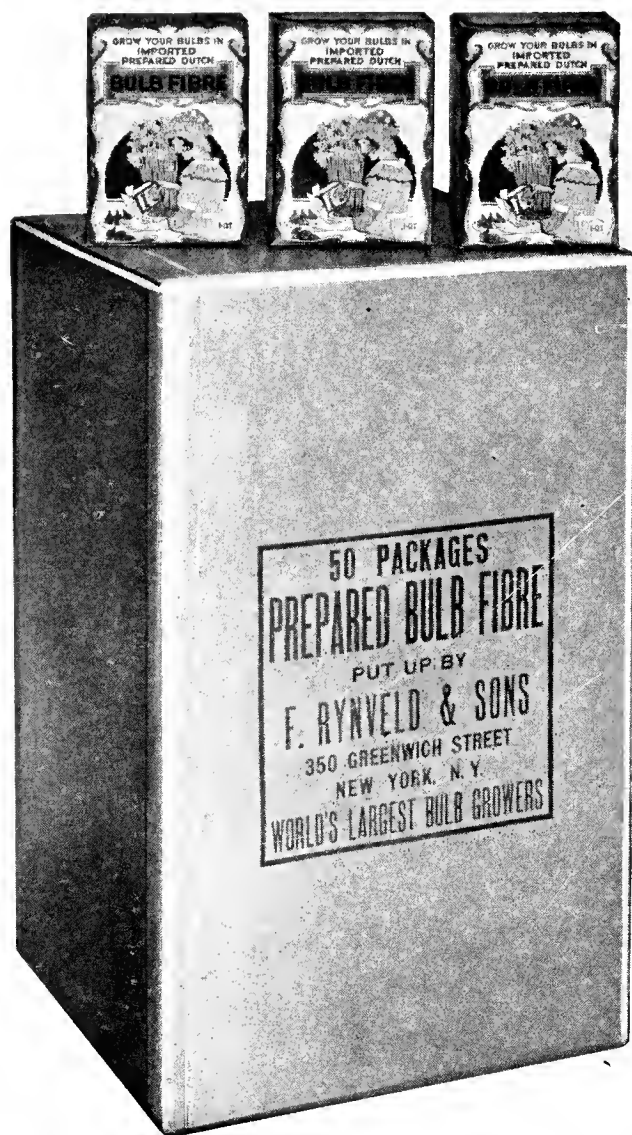

We are growing a nice block of Peonies on our Long Island farm and the plants look particularly well this season. No flowers are cut from this stock and thus the full strength of the plants is reflected in the roots we send out. We list below the most important kinds of which we have good quantities but we are also growing many other kinds that will be quoted upon application.
